

CABLE TIES AND ACCESSORIES

For long life and dependable service, there are many factors to consider when selecting the appropriate cable tie for the application. There are also various environmental conditions (such as weathering, flammability, chemical, radiation, moisture and temperature extremes), that will have detrimental effects on specific cable tie materials. **CARROLL** offers one of the widest selection of cable tie designs, styles and materials in the world. With cable ties available in lengths from 100mm to 1168mm, tensile strengths exceeding 110 kilos, identification marker ties, screw and push mount ties, we have a design and style to meet your specific application needs. Precision manufactured from UL approved nylon 6/6 with a flammability rating of UL94V-2, the nylon cable ties conform with mil-spec drawing MS-3367 and are tested under NATA Laboratory No. 987 & 1748 to meet or exceed the tensile strength requirements of MIL-S-23190D, and are UL recognised under File No. E193811. For every cable tie, there is a Quikcrimper installation tool available to provide a fast, dependable method of application.

MATERIALS

1. NATURAL NYLON 6/6

Primarily used in indoor applications. Life expectancy in ultraviolet light, (sunlight), is one to two years*. The normal operating temperature range of nylon 6/6 is -10°C to 85°C.

2. BLACK WEATHER RESISTANT NYLON 6/6

Primarily used in outdoor applications. Over a period of time, ultraviolet light attacks most plastic materials and reduces their properties by breaking down the molecular chain. A uniform dispersion of 2% carbon black provides UV resistance and increases the cable tie life expectancy to 7-9 years*.

3. STAINLESS STEEL

Primarily used in petro-chemical, marine, severe hostile environments, flame-proof installations and applications of long term external exposure or weathering where a life expectancy of >20 years* can be expected. Operating temperature is -45°C to >500°C. *This is based on the assumption of minimum loading, no chemical attack and impact-free conditions.

HOOK & LOOP CABLE TIES

Cable Ties are a simple, highly adjustable, reusable strap with numerous applications. Ideal for optical fibre cabling, telecommunications, cord and cable control, extension leads, hire equipment and recreational applications. The ties are supplied on convenient rolls.

PART NO.	COLOUR	LENGTH x WIDTH	TRADE PRICE PER PACK	PACK QTY	CODE B
V200-19/100	BLACK	200x19	\$417.41	1100	

HOOK & LOOP STRAPPING

Back to back hook and loop strap. Infinitely adjustable to any size, the user simply wraps the strapping around the objects to be held and cuts to length with scissors or knife. Soft to touch and reusable, with no buckles to get in the way. Eliminates the potential for damage to fibre optics or cables caused by possible over-cinching or accidental cutting.
