

COPPER CABLE LUGS AND LINKS

CARROLL copper cable lugs and links are manufactured from 99.9% oxygen free, high conductivity copper, electro-tin plated for superior corrosion resistance, and feature an extended operating temperature range of -55 to 155°C. Lug sizes 10 to 95mm² are supplied bellmouth as standard. All other sizes are straight barrelled.

LONG PALM-LONG BARREL LUGS

Carroll Long Palm-Long Barrel Lugs are designed to accommodate two bolt mounting for secure termination. The longer barrel allows improved surface area for heatshrink sealing and multiple crimps if desired. Sizes above 300mm² are supplied blank and can be drilled to order. Designed to be crimped with standard hexagonal dies and tooling.

CIRCUIT BREAKER NARROW PALM LUGS

Palm widths of standard copper lugs are too wide to fit 150 to 250A circuit breakers. **CARROLL** has solved this problem with our specially designed and manufactured Narrow Palm or Circuit Breaker Lugs, which also feature a convenient bell mouth to facilitate easy insertion of flexible cables.

As these lugs utilise standard barrel dimensions, normal crimping rules using standard tools and crimp dies apply.

BI METAL LUGS

The Carroll series of BML Copper – Aluminium Lugs are specially designed for transition connection of circular aluminium cable Hemi Cycle – Sector Aluminium cable and power supply cables. These lugs are constructed of Aluminium (L3) and Copper (L2) utilizing high technology friction welding ensuring for strong bonding characteristics, high technique corrosion resistance and long service life.
