

MULTI PIN CONNECTORS

6007 SERIES CONNECTORS

There are many special features of the 6007 connector series that exceed standard connector design practices. Rated at up to 300V AC/DC, these compact connectors will withstand 1,500V AC/minute, and operate within a temperature range of -25°C to 105°C. Polarised to ensure correct mating, a positive locking latch also automatically engages at mating, and the option exists for in line or hand fitted panel mounted installation. The complete cell housing system fully covers and protects the contacts. The high reliability 2mm O.D. crimp contacts, are easily snapped into the housings by hand, with two sizes covering a wide wire range from 0.2 to 2.0mm². Maximum contact resistance is limited to 10 ohm.

POLES	VOLTAGE RATING	CURRENT RATING	RECEPTACLE HOUSING (for pin contact)		PLUG HOUSING (for socket contact)

QK SERIES CONNECTORS

These connectors conform to the common 250 series, 6.0mm (J.A.S.O.) and 6.3mm (European) standards. All connectors are polarised to prevent incorrect mating. A positive locking latch automatically engages at mating for connectors with an "L" suffix. Housings with a "T" suffix also feature panel mounting tabs. Latch type housings and non-latch housings can be mated if required. The tin plated crimp contacts, are easily snapped into the housings by hand, with two sizes covering a wide wire range from 0.8 to 3.0mm². Note: The plug housing is also referred to as the female housing, as it accepts the female terminal. The receptacle housing is also referred to as the male housing, as it accepts the male tab terminal.

QL SERIES CONNECTORS

These connectors are a 312 series or 8mm. Both connectors are polarized to prevent incorrect mating. A positive locking latch automatically engages at mating for the single circuit connector. The standard connector used in fusable links. The tin plated crimp contacts, are easily snapped into the housings by hand. Applicable terminal wire range is 1.3 to 5.0mm². Note: The plug housing is also referred to as the female housing, as it accepts the female terminal. The receptacle housing is also referred to as the male housing, as it accepts the male tab terminal.
