

SPIROLL WRAPPING BAND

SPIROLL

Spiroll, spiral wrapping band is designed to bind and protect hoses, wires and cables in harnesses and wiring looms. Manufactured from either natural or black polyethylene, the material exhibits excellent electrical, abrasive and binding strength.

Spiroll's flexible construction enables the easy routing of wiring looms. Due to the material's durability, the product is re-useable and has almost unlimited expansion. Depending on roll size and diameter, Spiroll is either supplied in specially designed dispenser boxes or plastic bag.

QUICKFLEX

QUICKFLEX

QUICKFLEX braided (or woven) sleeving from **CARROLL** is a flexible, expanding harness, made from single filament polyester. The woven construction allows QUICKFLEX to expand in diameter considerably to firmly harness wire lengths.

Wires can also be poked through the sleeving, to enable harness breakouts (see picture).

LOOM TUBE

Loom tube is a split corrugated conduit designed for quick, neat, cost effective wire harnessing or where flexible protection is required for cable connections, such as between cabinets and instruments mounted on hinged cabinet doors.

The product is manufactured from black, flame retardant (UL94-V2), polypropylene copolymer, with a maximum operating temperature of 90°C.
