

ERB Series

High Current Terminals Bornes à Courant Élevé

ERB type rail mounted terminal blocks are developed in order to have safe connections of high current carrying conductors. In this type of rail terminals, cable connection is done by cable lugs connected to the tips of the conductor. Isolation cover is designed for cable lugs having different dimensions. Cross connection up to 4 poles is available. Due to its universal structure, it is possible to mount ERB on MR 32 & MR 35 rails. A fixing screw is available in order to maintain a more secure mounting on the DIN rail.

La série ERB est constituée de bornes qui ont été développées pour pouvoir supporter des courants forts. Dans ce type de borne, la connexion se fait avec des câbles équipés de cosses. Un couvercle isolant est prévu pour des câbles de section différentes. Des shunts jusqu'à 4 pôles sont disponibles. Grâce à leur structure universelle, il est possible de monter la série ERB sur des rails MR 32 et MR 35. Des vis de fixation sont disponibles afin d'obtenir un montage sécurisé sur le rail DIN.
